

LINCOLN WELDERS

AC-225C STICK WELDER

This stick welding power source has continuous output control and produces a very smooth welding arc at any amperage. The AC-225C can be used for many welding applications such as maintenance repairs, fabrication, modifying equipment, and creating or rebuilding tools, fixtures, or worn parts.

Features: • Easy Installation • Input power cable and plug included • Easy to Operate • Electrode holder and cable, work clamp and cable, sample electrodes, welding helmet and welder's guidebook all included • Easy to use controls • Convenient size to allow easy storage and handling • 3 year warranty including parts and labor • Output: 170 amps, 25 volts, 20% duty cycle • Amp Range: 40-225 • Size: 15.2" h X 14" w X 13.5" d • Weight: 86 lbs. • CSA approved • UL listed • Powder Paint Finish for increased durability.

AC/DC 225/125 STICK WELDER

AC/DC 225/125 is the deluxe version of the AC-225. The same design but enhanced with the smoother, more stable DC welding arc. This model gives you the flexibility to use the AC arc for welding heavy plates or the DC for thinner materials giving you a low current, stable arc. The AC/DC 225/125 is perfect for use in the home, on the farm, shop, or for professional use.

Features: • Easy installation including input power cable and plug • Electrode holder and cable, work clamp and cable, sample electrodes, and welder's guidebook all included • Easy to operate • Easy to use front mounted polarity switch and full amperage selector switch for accurate procedure setting. • 3 year warranty including parts and labor • Output: AC: 225 amps, 25 volts, 20% duty cycle • DC: 125 amps, 25 volts, 20% duty cycle • Amperage range: AC 40-225, DC 30-125 • Size: 24" h X 17.3" w X 12" d • Wt: 129 lbs.

SP-135T WIRE FEEDER/WELDER

SP-135T is a lightweight, compact 120V wire feeder/welder and breezes through MIG welds on a wide range of materials including mild steel, stainless steel and aluminum. Handles flux-cored welds on mild steel with ease. Practically everything you need to MIG weld mild steel is right in the box. **Unit Includes:** • 4-Step Tap voltage control • Magnum® 100L welding gun and 10ft. (3m) cable assembly, with gas nozzle, .023" - .035" (0.6-0.9mm) cable liner and .023/.025"

(0.6mm) contact tip • 10ft. work cable & work clamp • 6 ft input power cord with NEMA Type 5-15P plug • Guide tubes and reversible drive roll for .023-.035" solid MIG wire and .035" Innershield® flux-cored wire • Factory installed gas solenoid valve • Adjustable gas regulator and hose for Argon and Argon-blend gases • 2 lb. spool of .025" SuperArc L-56 mild steel MIG wire • 6 spare .023/.025" contact tips • Welding handshield with #10 filter plate and clear glass cover plate.

SP-135 PLUS WIRE FEEDER/WELDER

This user-friendly wire feeder/welder is ready to help you make short work of many around-the-home jobs, hobby projects, autobody repairs or farm chores! SP-135 Plus handles MIG welds on a wide range of materials including mild steel, stainless steel & aluminum. Flux-cored welds on mild steel are a breeze. Achieve outstanding performance on thin sheet metal to medium plate by fine-tuning the arc using the continuous output voltage and wirefeed speed controls. Also boasts industry leading output and arc performance in the 115V machine class. To top it off, we've made it easy to get started - virtually everything you need to MIG weld mild steel is included in one convenient package! Just add shielding gas (sold separately).

LINCOLN POWER MIG 140T & MIG 140C

Select the economical Power MIG® 140T (K2470-1) with simple tapped voltage control for basic MIG and flux-cored welding. Choose the Power MIG® 140C (K2471-1) with continuous voltage control for more critical projects where precise adjustment is required. Either way, Diamond Core Technology™ and the rugged

drive system aid arc performance for MIG welding on thin gauge steel, stainless and aluminum. Or, use gas-less flux-cored welding for deep penetration on thicker steel, even outdoors! With a wide 30-140 amp welding output range it is the highest output in 120 volt input power welder class. MIG weld 24 gauge up to 10 gauge (.135") sheet metal in a single pass. **Unit Includes:** • Magnum 100L welding gun (K530-6) • Six spare contact tips • Gas and gasless nozzles • Work cable and work clamp • Adjustable gas regulator and hose (for argon & Ar-blend gases) • .025 and .035 smooth drive rolls • .030-.045 knurled drive roll • .025-.035 wire guide • 2 lb. spool .025" Super Arc® L-56 wire • 1 lb. spool .035" Innershield® NR-211-MP self-shielded flux-cored wire • 8" spool spindle adapter • How to Use DVD.

Lincoln Power MIG 140T K2470-1 12-01624 **\$604.95**
 Lincoln Power MIG 140C K2471-1 12-01623 **\$658.95**

LINCOLN POWER MIG 180T & MIG 180C

The Power MIG® 180 will help you get the job done! It's a portable wire welder designed for use with industrial 230 volt input power, so you can weld on thicker material - up to 3/16" with MIG welding and 1/2" with gas-less flux-cored welding. Select simple tapped voltage control on the Power MIG® 180T for basic welding

jobs or continuous voltage control on the Power MIG® 180C for more critical projects where precise adjustment is required

Unit Includes: • Magnum 100L welding gun (K530-6) • Six spare contact tips • Gas and gasless nozzles. • Work cable and work clamp. • Adjustable gas regulator and hose (for argon & Ar-blend gases). • .025 and .035 smooth drive rolls. • .030-.045 knurled drive roll. • .025-.035 and .045 wire guides. • 2 lb. spool .025" Super Arc® L-56 wire. • 1 lb. spool .035" Innershield® NR-211-MP self-shielded flux-cored wire. • 8" spool spindle adapter. • How to Use DVD
